

This is to certify that  
***Shane Wenzlick***

Having undertaken the required course of training and met the assessment requirements is awarded this

## **Advanced UAS Remote Pilot Certificate**

*Endorsement in: Multi-rotor UAS  
DJI Mavic 2*

Awarded this 4th day of November 2021

Important notes:

This certificate constitutes evidence of an approved pilot qualification for the purposes of New Zealand Civil Aviation Rule 101.205 and qualifies the holder to operate within 4km of an aerodrome.

This qualification is an approved initial issue qualification for UAS pilots flying for an organisation certificated under New Zealand Civil Aviation Rule Part 102. Operations for a Part 102 certificated organisation require that the pilot has obtained their initial issue qualification or successfully passed an Operational Competency Assessment within the last 12 months.

For operations conducted under Civil Aviation Rule Part 101 this qualification remains current for a period of 24 months, and may then be extended for further periods of 24 months on completion of a biennial flight test.

This certificate is awarded under the authority of the Part 141 Aviation Training Organisation certificate TR86491 issued by the New Zealand Civil Aviation Authority to Aviation Safety Management Systems Ltd.

A handwritten signature in black ink, appearing to read 'Andrew Shelley'.
